Certifications:
The Complete JavaScript Course: From Zero to Expert! | Udemy
Build Responsive Real-World Websites with HTML and CSS | Udemy
Oracle Certified Associate, Java SE 8 Programmer

Professional Experience
  - User Interface Development: Designed and developed user-friendly, responsive interfaces using HTML, CSS, and JavaScript to ensure optimal user experiences across different devices.
  - Real-Time Data Handling: Implemented real-time updates and feedback, including transaction history, game score updates, and subscription management.
  - Responsive Design: Ensured responsive design for all projects to maintain compatibility and usability across various devices and browsers.
  - Form Validation and User Input Handling: Implemented form validation and handled user inputs to ensure data integrity and security.
  - JavaScript Development: Utilized JavaScript for dynamic content rendering, including game logic, loan management, and subscription services.
  - Testing and Debugging: Rigorously tested, debugged, and optimized applications for performance, reliability, and cross-browser compatibility.
  - API Integration: Integrated external APIs to enhance the functionality of the applications, ensuring smooth communication with external systems (banking application).
  - Data Storage: Implemented local storage solutions, such as tracking high scores in games and handling transaction history in banking applications.
  - Dashboard Design: Developed and implemented interactive dashboards to present user data and key functionalities, such as banking transaction history.

Projects
1.Banking Application   07/2024
Developed and optimized a banking application with features like user transfers, loan management, account closures, real-time data updates, and an interactive dashboard for transaction history and user authentication.
2.Games Creation   04/2024
Developed an intuitive, responsive user interface with real-time feedback, dynamic game logic, and a high score tracking system using JavaScript and local storage, ensuring cross-browser compatibility.
 3.E-commerce Website   12/2023
Developed a subscription-based food service website with a responsive, user-friendly interface, supporting meal deliveries, menu viewing, subscription management, and form validation for handling user input.
